Intermasz 2026 – technological innovations and new development prospects in the construction machinery industry

In February 2026, the MTP Poznań Expo will once again become the epicenter of the world of professionals, enthusiasts, and leaders in the construction industry, thanks to the Intermasz, Budma, and Stone fairs taking place simultaneously. It is here that machine manufacturers and distributors will talk to owners and managers of construction companies, institutional investors, service providers, users, and developers about cooperation, development prospects for both the industry and their businesses, and trends that are worth prioritizing.

Relationships and innovations

The INTERMASZ trade fair, which focuses primarily on the presentation of construction machinery, including specialized machinery, cranes, transport equipment, and construction site equipment, maintains a two-year exhibition cycle. Considering that the BUDMA Fair, undoubtedly the most important meeting of the construction industry in Poland and one of the key events in Europe, and the Stone Fair (an event for the stone industry) are held at the same time, it is an ideal opportunity to

establish exceptionally fruitful relationships and a chance to gain an excellent overview of the latest developments in the industry. However, the Intermasz Fair is not only a review of technological innovations, but also a dynamic environment supporting development and the exchange of ideas in the construction industry. The success of the previous edition confirms that this event remains a key date in the calendar for everyone involved in the construction sector, bringing many benefits for business, professional development, and inspiration for further work.

Don't miss out on innovation

Leading companies from the construction sector will once again present their latest products, enriching their offerings with the most advanced machines, equipment, and technological solutions. From powerful cranes to precision material processing machines, participants will once again have the opportunity to see for themselves the potential of the latest achievements in construction technology.

Interactive machine demonstrations, including the opportunity to test the equipment yourself, and machine operation simulations using VR technology will introduce participants to the fascinating world of construction. This is not only a unique experience, but also practical learning for anyone interested in professional development in the industry.
